

DILUTION ratios

Since dogs come in many sizes, it's very important to properly dilute essential oils before applying them topically. The chart below is a handy guideline to achieve this proper dilution.

DOG WEIGHT	DILUTION RATIO	ESSENTIAL OIL	CARRIER OIL
0 to 25 pounds	75%	1 drop	4 drops
26 to 45 pounds	50 to 75%	1 to 2 drops	2 to 4 drops
46 to 75 pounds	50%	2 drops	2 drops
76 to 90 pounds	25 to 50%	2 to 4 drops	1 to 2 drops
91 to 150 pounds	25%	4 drops	1 drop
151+ pounds	0 to 25%	4 drops	0 to 1 drop

CARRIER oils

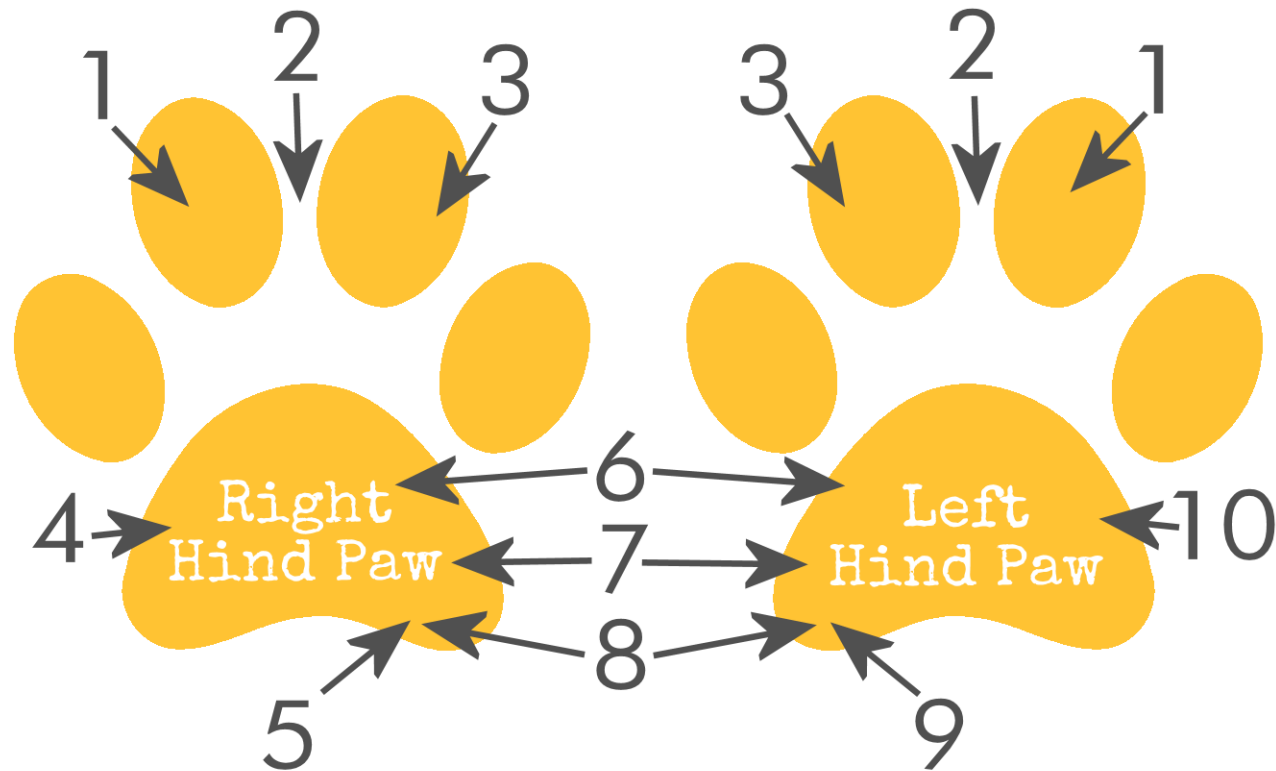

- extra virgin olive oil
- pure cold-pressed coconut oil
- other fatty oils like sweet almond or jojoba
- Young Living's V-6 oil blend
- Young Living's Animal Scents Ointment

APPLICATION methods

- Rub on your hands then apply it down your dog's spine or onto desired area in a petting motion.
- Spritz the oil with a spray bottle.
- Apply directly to desired area with a roller ball.
- Massage into the vita-flex points on the paw pads.
